

Dear <NAME>,

Writing a cover letter is a hard task to do, especially when you want to work for <COMPANY> as badly as I do. However I am going to convince you in a few paragraph that I will be a perfect fit for <COMPANY>.

Let's start with who I am, my name is Xavier Geerinck and I am fascinated by IT since I was only 12 years old. Even at this young age, I progressed very quickly, and was able to create a Content Management System for a Gaming Server that generated a revenue of 10.000 EUR, by the time I was 16 years old. Afterwards, I sold this CMS system for 1.000 to an interested party so that I could focus my time on other projects. Currently, I am 22 years old and did 4 Internships in the IT sector (November Five, Mobila, KumulAid and Nokia), I created 5 big projects (UnforgivenWoW, Nerdflow, FusionCMS, Feedient, Brewr) with one project that amassed 10.000 users within the first week and I became the CTO of a startup called KumulAid, which shows my eagerness to learn and to be successful in life. All of this is also reflected in my personality type as described at the website "16Personalities" which showed that I have a "ENTJ" personality, which is short for someone who is good at leading a team and creating business value.

Now after this short introduction of myself, I would like to explain to you why I would want to work at <COMPANY>. I am someone who like to solve problems and come up with creative/efficient solutions that work and demonstrate the potential business value for a company. That is why I like to create Proof Of Concepts that show the full potential of an idea, and then work together with a team to create a production worthy solution of it.

This is why I applied at <COMPANY>, I think that your culture is a culture where I am able to thrive in. For example, your <INSERT SPECIFIC RESEARCH AREA / JOB TITLE>. Hopefully we can work together and we can come up with a job description that allows me to show my true potential to <COMPANY>.

Of course I know that this motivation letter is only as short as it is now, I would like to tell your more about myself and the projects that I have done. Which is why I would like to invite you to give me a call at **+32 499 25 69 35** or send me an email at xavier.geerinck@gmail.com so that we can continue this discussion on a more personal level to see what I can do for you.

Kind Regards,
Xavier Geerinck
