"It's really hard to design products by focus groups. A lot of times, people don't know what they want until you show it to them." – Steve Jobs

customer knows their market the best, it is however up to others to listen to them and understand how they want to improve it. By listening and being obsessed about the customer, we can together build and innovate the world around them

My name is Xavier Geerinck and I am a Cloud Solution Architect at Microsoft, working together with my customers to create a strategy for the years to come on a **technical** level. Be it from creating architectures, towards providing the employees with the tools to get started with it.

- Business Development

ACTIVITIES

Next to all of this I am also always thinking about new projects, thinking on how to innovate the world and building it. You can find most of this on my Blog as linked above.

From Time to Time I also play Guitar as well as Badminton.
